

II. Get Info

A. Greenhouse Gases

- Click on the "Greenhouse Warming" site.
- Read the information and answer the following questions.

1. What are some greenhouse gases other than CO_2 ?

Chlorofluorocarbons (CFCs), used in refrigerators and spray cans, contributed to the ozone hole. Perfluorocarbons (PFCs) were thought to be a good alternative to CFCs since PFCs don't destroy ozone.

2. What are two reasons PFCs are a bad alternative to CFCs?

- Click "Back" to return to Greenhouse Effect "Get Info" web page.

B. Contributions of Gases

- Click on the "Major Greenhouse Gas" site.

A. What is the least important greenhouse gas? _____

B. What is the most important greenhouse gas? _____

C. Which greenhouse gas destroys another greenhouse gas?

- Click "Back" to return to the "Get Info" page.

- Click "Return" at the bottom of the page.

- Click "Gather Data."
